

Compressed Non-Asbestos

KLINGERSIL® Compressed Non-Asbestos Gasket Materials:

A tradition of quality since 1886. There are many factors to consider when selecting a gasketing material. Thermoseal Inc. aims to give you all the information you need to choose the right KLINGERSIL® material. Our temperature and pressure charts for each material take the guesswork out of matching applications with possible materials.

As an added service, Thermoseal Inc. offers technical support for any application where you are uncertain about which KLINGERSIL® material to use. Phone us or complete and send us the Technical Service Questionnaire, and we will be pleased to make a recommendation. Or ask about KLINGER®expert, our computer software program which has provided the industry with the most comprehensive engineering tool available to industry today.

KLINGERSIL® compressed non-asbestos gasket materials are available with a factory coating for ease of release. Specify NST coating when specifying or ordering gasket material.

Choose from the following for specific product information:

[Binder Type](#)

[High Performance](#)

[General Application](#)

[Fiber Type](#)

[Chemical Resistant](#)
