
Shelf Life of Sealex[®] Joint Sealant With PSA Adhesive Backing

The shelf life of Sealex[®] Joint Sealant with pressure sensitive adhesive (PSA) tape backing is indefinite.

PSA tape has no impact on the properties of the Sealex[®] Joint Sealant. It is merely there to hold the joint sealant in place until the flange is bolted together.

The ability of a gasket material to make and maintain a seal depends not only on the quality of the gasket material, but also on medium being sealed, the flange design, the amount of pressure applied to the gasket by the bolts and how the gasket is assembled into the flanges and tightened.

For product safety information, warranty and damage limitations, refer to the Material Safety Data Sheet (MSDS).
